Creating and appreciating a garden is a dynamic, creative process that benefits from inspiration. Gardeners in the Pacific Northwest are fortunate to have access to many garden styles and a wide variety of plant combinations at gardens that are open to the public – all within range of a day trip from Skagit Valley.
Our resident Anna's and migrating Rufous hummingbirds are an important part of our ecosystem helping control insects are great pollinators.
Join us for this year's Open House at the Discovery Garden, the Salal Native Plant Garden, and the NW Fruit Garden
Plants, education, food, music. Kick off your gardening season at the 30th Annual Skagit Master Gardener Plant Fair – Saturday, May 11 – 10 a.m. – 2 p.m.
Explore the benefits of using keystone plants to create a wildlife-friendly ecosystem in your own garden.
Learn about pollinators and open your eyes to the beauty and intricate connectivity of nature. As gardeners, we can make choices that will enhance or inhibit pollinators.
